

THERE'S NO OTHER SINGLE-HUNG LIKE IT.

This latest addition to the New Castle XT line was designed to address builders' needs for beauty, cost-efficiency, and simpler, faster installation. It matches the double-hung perfectly, so builders can create cost-effective window packages that don't compromise style.

Two-sash design. Two real sashes give this window the authentic look of a double-hung. And the removable upper sash allows for easier and safer replacement of the glass from the interior.

Trouble-free operation. $\frac{3}{4}$ " stainless steel balance system applies a constant force so sashes lift and lower easily — and stay where you put them. They never sag and they never need adjustment.

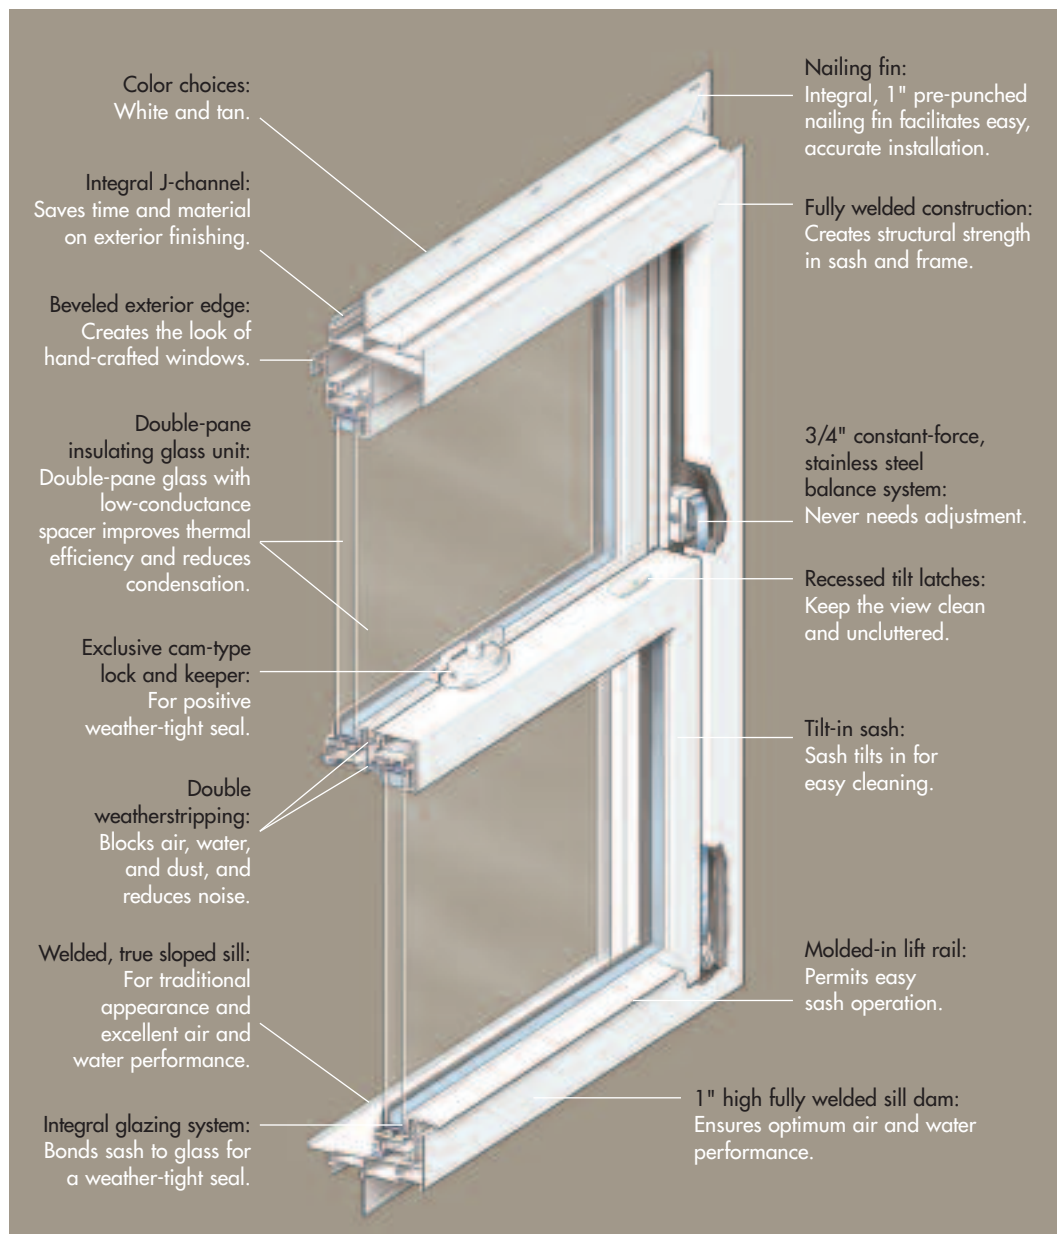

Easy cleaning. Spring-loaded tilt latches allow sash to tilt in for easy cleaning from inside the home.

Single-Hung Windows

SINGLE-HUNG WINDOW FEATURES AND OPTIONS

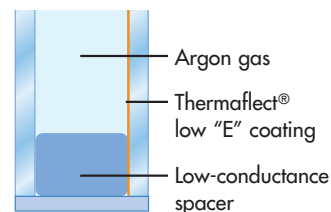

Color choices.

White or tan.

Grids between the glass.

Color-coordinated, sculptured or flat grids are installed between the glass panes during manufacturing for easy cleaning.

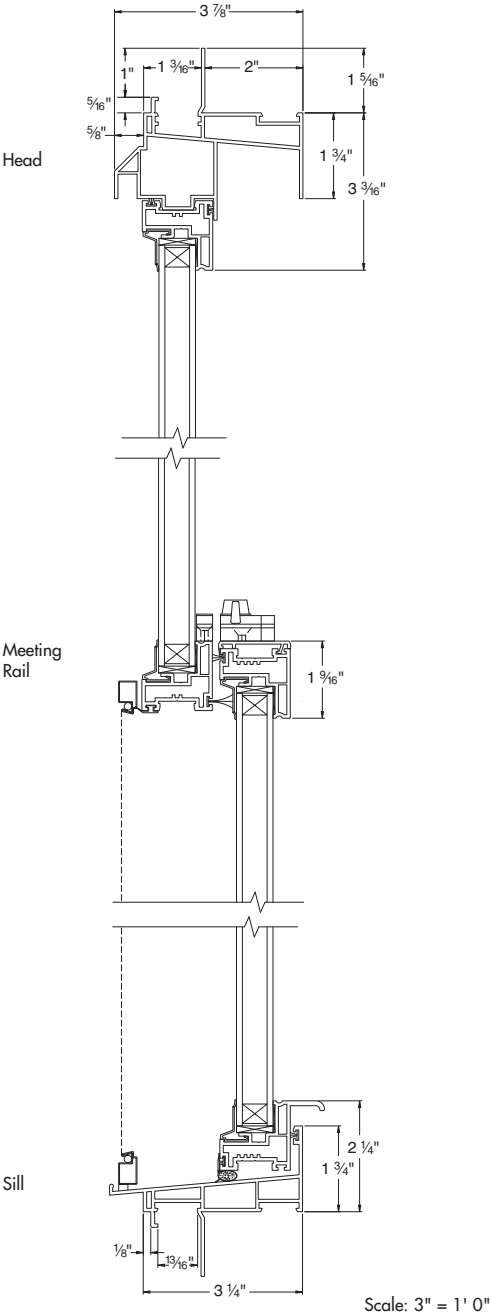

ENERGY STAR® efficiency.

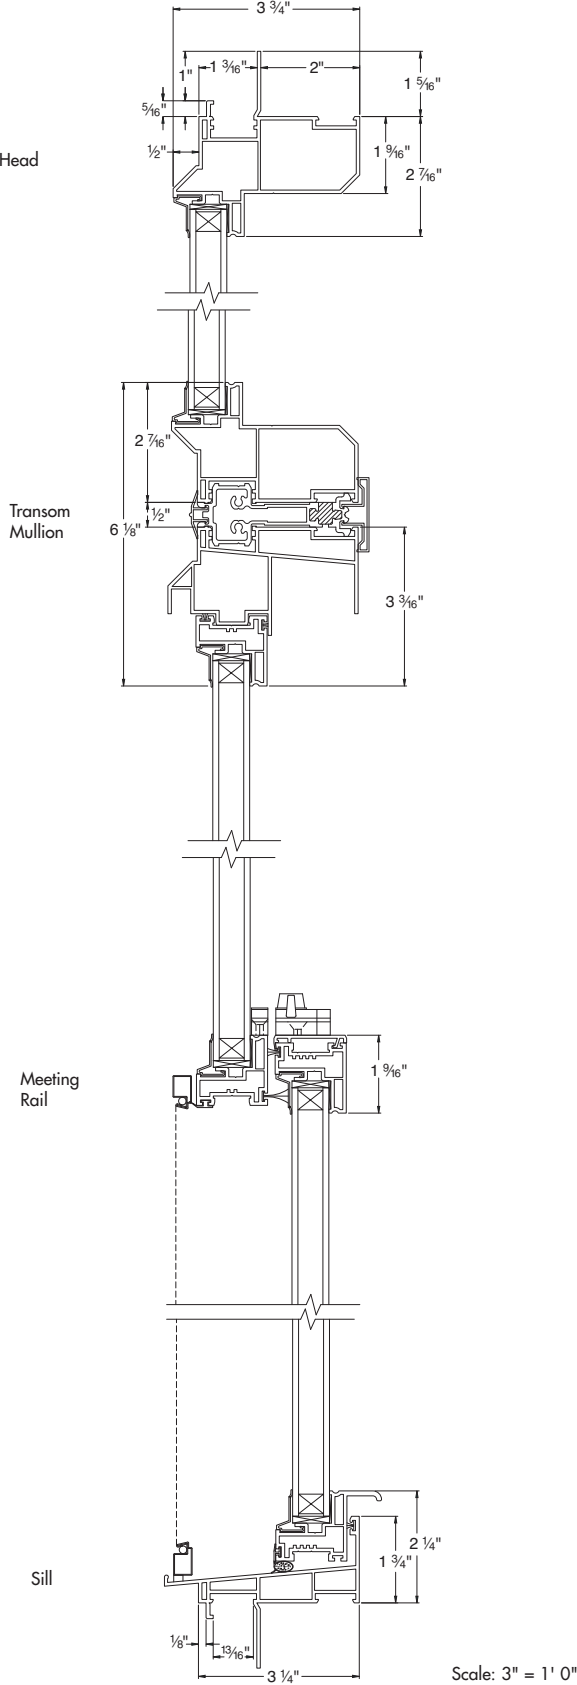

With the option of CertainTeed's proprietary ThermoFlect® glazing system with low-conductance spacer and insulating argon gas, New Castle XT windows meet ENERGY STAR guidelines in all four U.S. climate zones.

Callout sizes are expressed in inches and equal rough opening.

New Castle XT single-hung windows have an interior frame depth of 2" and an exterior projection of 1 7/8" from the nail fin.

When mulling a unit to a single-hung, overall rough opening is not affected by the mullion.

* 66" tall windows are the maximum size available as oriels. Oriels are windows having 60% to 40% sash height proportions with the larger sash on top. Reverse oriels have the smaller sash on top.

† Meets egress of:
Clear openable area ≥ 5.7 sq. ft.
Clear openable width ≥ 20"
Clear openable height ≥ 24"

‡ Requires egress hardware to meet egress.
Specify egress hardware when ordering.

◆ Meets DP50 rating.
Specify DP50 when ordering.

TRADITIONAL STYLING WITH ADVANCED ENGINEERING.

New Castle XT windows reflect the look of traditional craftsmanship, with details like beveled exterior edges and a 5-degree true-sloped sill. And they're built for strength, with solid vinyl construction and operating hardware that is tested and proven for decades.

Design flexibility. Use double-hungs alone or with other CertainTeed styles to create big and beautiful combinations.

Trouble-free operation. $\frac{3}{4}$ " stainless steel balance system applies a constant force so sashes lift and lower easily — and stay where you put them. They never sag and they never need adjustment.

Easy cleaning. Spring-loaded tilt latches allow sashes to tilt in for easy cleaning from inside the home.

Callout sizes are expressed in inches and equal rough opening.

New Castle XT double-hung windows have an interior frame depth of 2" and an exterior projection of 1 7/8" from the nail fin.

Windows are joined using New Castle XT Structural Mullion. This mullion does not change the rough opening dimension.

† Meet egress of:

Clear openable area ≥ 5.7 sq. ft.
Clear openable width ≥ 20"
Clear openable height ≥ 24"

◆ Meets DP50 rating.

Specify DP50 when ordering.

A SPACE-MAXIMIZING DESIGN.

The slider window is a popular style for today's homes, especially when space is at a premium. CertainTeed's New Castle XT slider combines a sleek design with advanced window engineering, for an excellent view and a comfortable home.

Easy cleaning. Operable sashes lift out for easy cleaning from the inside. For added security, closed and locked sashes cannot be removed from the exterior.

Optimum viewing area. Slim profiles, color-coordinated hardware, and a large viewing area give you clean, continuous lines and an unobstructed outlook.

Expanded style selection. Choose from single and double slider styles, and even 3-lite end-vent sliders like the one shown here, in a wide range of sizes.

Slider Windows

SLIDER WINDOW FEATURES AND OPTIONS

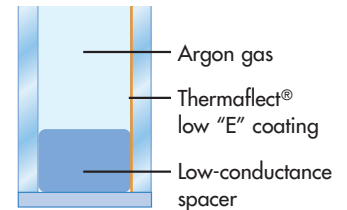

Color choices.

White or tan.

Grids between the glass.

Color-coordinated, sculptured or flat grids are installed between the glass panes during manufacturing for easy cleaning.

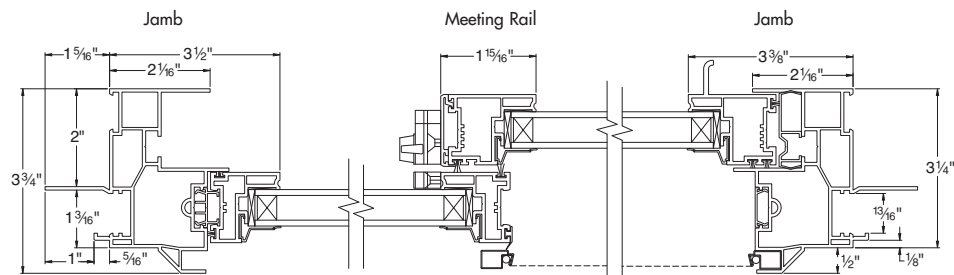

ENERGY STAR® efficiency.

With the option of CertainTeed's proprietary Thermafect® glazing system with low-conductance spacer and insulating argon gas, New Castle XT windows meet ENERGY STAR guidelines in all four U.S. climate zones.

Callout sizes are expressed in inches and equal rough opening.

New Castle XT slider windows have an interior frame depth of 2" and an exterior projection of 1 3/4" from the nail fin.

When mulling a unit to a double slider, overall rough opening is not affected by the mullion.

† Meets egress of:
Clear openable area ≥ 5.7 sq. ft.
Clear openable width ≥ 20"
Clear openable height ≥ 24"

♦ Meets DP50 rating. Specify DP50 when ordering.

Callout sizes are expressed in inches and equal rough opening.

New Castle XT slider windows have an interior frame depth of 2" and an exterior projection of 1 3/4" from the nail fin.

When mulling a unit to a 3-lite end-vent slider, overall rough opening is not affected by the mullion.

All units shown utilize a common frame.

Fixed center window constitutes 50% of the unit with operable sash at 25% each (XOX).

3-lite center-vent slider also available (OXO). Each unit represents 33.3% of the total window. Callout is XTCV35L.

Sculptured or flat grids between the glass available in fixed center window.

Also available in double-slider frame. Specify when ordering.

† Meets egress of:
Clear openable area ≥ 5.7 sq. ft.
Clear openable width ≥ 20"
Clear openable height ≥ 24"
