

CertainTeed has been rated the top performing vinyl window in America.

A national independent consumer reporting organization periodically rates replacement windows.

Based on overall scores, CertainTeed's Bryn Mawr II™ double-hung windows

rated higher than any other vinyl window tested. In fact, the nearest vinyl competitor was four places behind!

The tests simply confirm the obvious. CertainTeed's

excellent performance, plus a huge style selection, superior service, and a strong warranty have made it the vinyl window most used by contractors across the country.

Test #	Result	Reason
Test 1: Insulation Value	Excellent	CertainTeed matched the R-value of the top-rated clad-wood window — listed at a price nearly 60% higher.
Test 2: Wind-Resistance	Excellent	In tests at both 0°F and 70°F, CertainTeed was the only vinyl window with a combined excellent rating.
Test 3: Rain-Resistance	Very Good	Only two of the six other vinyl windows tested managed to equal CertainTeed's rating.
Test 4: Durability	Very Good	This test evaluated performance after 14 days of severe temperature fluctuations and intermittent spraying with water. No vinyl window out-performed CertainTeed.
Test 5: Condensation-Resistance	Very Good	CertainTeed rated higher than the three leading clad-wood windows.
Test 6: Ease of Use	Excellent	Again, CertainTeed rated higher than the three leading clad-wood windows.
